Company Profile

ALTO - your partner for design, planning, architecture and construction of small and medium sized airports, has an experienced team of architects, urban designers, engineers and real estate partners, who in combination offer the full range of Design & Build of hangars, small airport design & masterplanning.

ALTO today employs 3 people, who have over many years collected unmatched experience in the field of hangar design & build and master planning for GA activities.

Products and services

ALTO'S core business is the design & build of hangars. Our special expertise is found in the optimum combination of efficient construction, dry climate, easy handling and of course, costs.

These goals can only be achieved with reliable experienced partners. ALTO has built up an international network of first class construction companies, door producers and planning partners. Today, we can offer our services for the majority of countries in the world.

The ALTO hangar carousels for aircrafts and jets rotate circular floor space in almost any dimensions. It can be integrated in existing or planned hangars. Any aircraft parked on it is relocated automatically into door position within a minimum of time.

ALTO's architects, engineers and business developers are Germany's leading specialists for hangar planning and the development of small airports. In our field, we work as consultants and reviewers.

Furthermore, we consult the international airport business community in their hangar projects of any scale and are experienced airpark master planners.

By integrating our rotating platforms in your hangar projects, you avoid hangar rash, save time, save man power and save money after all.

Target group

Clients and sales structure: we sell to airports, FBO's flying clubs and schools, developers and private persons. Our product and market is so unique, we usually sell directly from Germany. In some countries we work with local representations.

Airport Bielefeld EDLI, Airport Bonn-Hangelar EDKB, Airport Braunschweig Wolfsburg EDVE, Airfield Donaueschingen - Villingen EDTD, Frankfurt Egelsbach Airport EDFE, Airport Grenchen LSZG, Airport Kassel Calden EDVK, City - Airport Mannheim EDFM, Airfield Münster Telgte EDLT, Luftsportzentrum Oerlinghausen EDLO.

Competitive Advantages

Our partly patent protected structures have great durability and are smartly engineered to be cost saving and long lasting. We are the only global company to have built platforms for larger than piston aircraft. We have 15 years of experience in hangar projects and have unmatched knowledge and experience in this field.

Purpose of Visit in China

Find partners and clients for our parking deck structures and maybe other cooperations.
