Company Profile

AutoGyro is the world market leader in the development, production and distribution of gyroplanes.

Established in 1999, the specialist for light sports aircraft has continuously expanded and now employs more than 140 highly qualified professionals and engineers.

In 2004 the first gyroplane received German type approval. This was the beginning of a success story that has continued up to the present day.

In 2007, all gyros went into series production. The company currently has three different models and is manufacturing more than one gyroplane per day. With distribution partners in almost 40 countries, AutoGyro operates a global sales organization with the objective of marketing the flying enjoyment, safety and the versatility of the gyroplane.

Products and Services

AutoGyro specializes in the development and production of gyro planes (ultra-light sports aircraft). It manufactures three different models: MTO Sport, Calidus and Cavalon.

AutoGyro also offers gyroplane services and maintenance, as well as maintenance training courses provided by its specialist personnel. Global spare parts supply service.

Target Group

AutoGyro appeals to a broad customer base, including enthusiasts and private pilots, as well as an increasingly number of potential customers in the commercial sector. (E.g. collection of cartographic/geographic data)

National sales are generally either direct or via flying schools/distribution partners. International markets are supplied via in-country partners, ideally partners with an aviation background.

Competitive Advantages

As the world market leader in our segment we pride ourselves in our advanced product technology, the series production concept for our gyros, our worldwide distribution network and our innovative research and development activities. As a result we offer a range of gyroplane models that satisfy various international certification and approval requirements.

Purpose of Visit in China

AutoGyro feels positive about the development of the Chinese market in the region General Aviation. The visit with the delegation of the economics ministry conduces the clarification of statutory registration regulations and political questions in the context of an opening of the Chinese airspace for General Aviation, since AutoGyro already disposes over successful establishments of the Chinese market with the distributor German Light Aircraft Berlin / Laiwu.
