Solutions for a quieter world

www.guh-schallschutz.de

Company Profile

The roots of G+H go back to 1878 with the founding of Grünzweig & Hartmann oHG.

Today G+H Schallschutz is one of the leading companies worldwide in the technical acoustics industry. Our solutions are the result of over half a century of research, development and international project experience. Our customers of the industrial and automotive sectors, power plants, gas & oil and aviation benefit from a full portfolio of services relating to noise control - from the initial analysis to turnkey implementation.

Since 2002, G+H Isolierung has been a part of VINCI Energies Deutschland and thus belongs to the world's largest construction group VINCI S.A.

Products and Services

G+H Schallschutz is one of the leading European companies in insulation technology, in structural fire protection and noise control (EU patent EP 0918 687 B1, etc.).

Our customised solutions make gas turbines not only quieter, they simultaneously provide maximum availability and economically optimum operating conditions. Our service portfolio includes acoustic, fluidic and technical filter design and development, as well as engineering and project management through to manufacturing and turnkey installation.

Benefit from our full portfolio of services:

From consulting and planning to delivery and installation, with us you get everything from a single source. Our solutions are the result of many years of research, development and global project experience.

References

Noise control hangars: Munich Airport, Hamburg Airport, Leipzig Airport, Zurich Airport

Jet engine test benches: GE Cardiff, LH Frankfurt, MTU Zhuhai, United Airlines San Francisco, etc.

Gas-fired power plants: Tongxiang China, Posco Korea, Dgen India, Colongra Australia, Tuas Singapore, Serov Russia, etc.

Target Group

Airports, jet engine manufacturers, companies for jet engine maintenance. Distribution at trade fairs (Interairport), publications in journals, airport networks

Power plant operators, gas turbine manufacturers, distribution at trade fairs (VGB, VDI, Power Gen), publications in journals, making direct contact

Competitive advantages

Noise control hangars: G+H is the world's only full-range supplier for enclosed installations (patent no EP 0918 687 B1)

Jet engine test benches: experience in the design and implementation of international projects

Gas-fired power plants: experience in the design and implementation of international projects

Technical noise control in China is still in its infancy. There are hardly any local companies but demand is increasing rapidly

Purpose of Visit in China

Increase knowledge about the market situation

Presentation of G+H on the Chinese market

Contacts with potential new customers, especially at the major airports of Beijing and Shanghai
